The Ethox Infu-Surg® provides reliable results and quality performance.

Designed to be convenient and simple to operate, Infu-Surg® bags load quickly, easily and are single hand operated, allowing the user to simultaneously control other operating devices. Available in multiple sizes, adaptable with most IV bags, Infu-Surg® can be used for a wide variety of fluids.

Cost effective enough to be used as a single use device reducing cross contamination. Additional benefits include: colour coded gauge, a pressure relief valve and a single hand stop-cock. The Infu-Surg® provides superior reliability, is safe and simple to use.

Product Features:
- Pressurises or deflates easily with just one hand
- Designed with a transparent front panel for observation
- Three-way valve ensures precise control for adjustments
- Easy to read colour-coded gauge for quick feedback on pressure status
- Pressure Relief Valve protects the bag from over-inflation
- Oval shaped bulb eases inflation of bladder
- Has external inflation capabilities
- 100% Latex Free
- Convenient & Cost effective
