QA 3
Patient Trolley System

Designed following comprehensive research into patient trolley function and ergonomics
The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.
A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress. Optional features include a monitor shelf and a Venturi suction system.
Innovative technology – practically applied

Anetic Aid Limited has been designing, manufacturing and supplying operating theatre equipment to hospitals in the UK and overseas for over 30 years.

Renowned for innovation and high quality, the company believes in listening to customers and working closely with them to develop state-of-the-art products for a variety of clinical environments. It offers a broad range of equipment including surgical and patient transport trolley systems, tourniquets, theatre furniture, operation table accessories and surgical instruments.

With its commitment to using the latest technology and materials for maximum functionality, the company is proud to be launching the latest generation of its QA3 Patient Trolley System: ideal for patient transport, examination and intubation – and with a special model available for radiography in theatre and emergency areas – it is designed for maximum ease of use combined with superior patient comfort.

Its compact construction is light weight yet robust, and its advanced steering system and ergonomically positioned pushing handles make it supremely manoeuvrable and easily guided by one person. Wider than the previous version by 100mm (although the overall trolley width has only increased by 30mm), it descends to an exceptionally low height, while unique foldaway cotsides store away under the mattress footprint to give a virtually zero transfer gap. The back rest is gas assisted for easy lifting and Trendelenburg (and reverse Trendelenburg) tilt can be operated instantly at any height from the head end.

Vertically operated cotsides – store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation.

Hydraulic lift mechanism – exceptional low height capability, adjusted by means of independently operating pedals located on both sides of the trolley.

The QA3 Version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas.

- **Fixed transfusion pole** – innovative quick release safety locking mechanism, integrates into either head or foot end of cotsides for easy access and storage
- **Trendelenburg tilt** – extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height
- **Cylinder trough** – side loading for ease of access, suitable for a wide range of cylinder options including F, E or D
- **5th wheel steering** – unique mechanism which ensures trolley is highly manoeuvrable and easily guided by one person
- **Gas assisted backlift** – unique design, precision controlled, easy lift system for enhanced user and patient comfort
- **Castors** – polyurethane tyres offer low rolling resistance for high manoeuvrability. 150mm castors fitted as standard, 200mm optional
A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress.

**Pushing handles** – four ergonomically positioned pushing handles give supreme manoeuvrability either with the patient lying flat or sitting up.

**Patient comfort** – exceptional low height capability and store away cotsides allow easy mount/dismount particularly for elderly patients.

Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists.

**K8 pressure care mattress** – manufactured from temperature-sensitive gel feel foam that moulds to the patient’s body shape, relieving pressure by distributing the load as evenly as possible. Developed with the flexible properties of lycra, this outer material is anti microbacterial, water resistant, vapour permeable and latex free.

**Infection control** – smooth moulded surfaces and acrylic capped vac formings enclose the trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design ensure the product is easy to clean.

**10 YEARS LIFETIME WARRANTY**

SUBJECT TO ANNUAL SERVICE
Optional Extras

2 fixed transfusion poles – fitted as standard to emergency trolley

X Ray translucent platform – full length radio translucent platform suitable for digital or traditional plates

Advanced braking – exceptionally stable platform, advanced single bar braking system that allows all four castors to be braked simultaneously from either side of the trolley

Lifetime service and maintenance offer on all new QA3 Trolley Systems
A comprehensive product servicing and maintenance programme is available for all QA3 Patient Trolleys, delivered by Anetic Aid’s network of field engineers across the UK. Recognising the need for rapid response, the company keeps a stock of every component required for this product.

ITEM Cat No
QA3 Series version 3.0
QA3 Variable Height Patient Trolley (non X-ray) c/w K8 pressure care mattress 21110
QA3 Variable Height Patient Trolley (with X-ray translucent platform and medial) c/w K8 pressure care mattress 21120

Standard features
Hydraulic lift mechanism – exceptional low height capability
Vertically operated cotsides – giving a virtually zero transfer gap
Trendelenburg tilt – extremely smooth and controlled mechanism
Latest castor technology – low rolling resistance for high manoeuvrability
5th wheel steering – easily guided by one person
Pushing handles – ergonomically positioned
Gas assisted backlift – horizontal to near vertical
Advanced braking system – exceptionally stable platform
Fixed transfusion pole – innovative quick release
Cylinder trough – side loading
K8 pressure care mattress – body mould foam, anti-bacterial and latex free
Patient utility trays
Rotating buffers – at head and foot ends
Infection control – anti-bacterial properties and smooth moulded surfaces

Dimensions
Overall length: 2130mm
Overall width: 735mm
Height range (Non X-ray) – 475mm to 775mm (excluding mattress)
Height range (X-ray) – 520mm to 820mm (excluding mattress)
Height range (Endoscopy Non X-ray) – 525mm to 875mm (excluding mattress) - 21138*
Trolley weight: 128kg (21110) 148kg (21120)
Maximum patient weight – 250Kg (Please refer to user manual)

Optional extras
200mm Castors 21132 *
Reverse Trendelenburg QA3 21135 *
Endoscopy – increased maximum height 100mm 21138 *
Emergency Venturi Suction System Complete 21145
Foot End Stop / Monitor Shelf 21151
Fixed Pushing Handles Foot End 21155 *
Spare Transfusion Pole Fixed 21161 *
Grey Cotside Covers 21172
Child Print Cotside Covers 21173
Department Identification 21175 *
K8 Pressure Care Mattress 21185
K8 Pressure Care Mattress – zip cover 21186
Pillow – reversible 21188
Foot-end Mattress Protector 21189
Patient Storage container 21191 *
Lateral Cassette Holder 21192
X-Ray Tray 21195
X-Ray Tray Guides 21196
Oxygen Cylinder Bracket – for CD systems 21393

*Denotes factory fitted option – please specify at the time of ordering
